

High and Slide Multi-Function Tailgate

Hi-Lift Tailgate offers Convenience

- Additional 18" of tailgate opening
- Reduces tailgate damage with more clearance available when removing bulky material

Sliding Tailgate offers Versatility

- Provides control of material by in-cab adjustment of tailgate opening
- Eliminate the need for flow plates when used for snow and ice control
- Connects easily with sealing equipment eliminating concerns of damage from the tailgate swinging into the equipment
- Access material without raising dump body for quick shovel loads required

Two-In-One design offers Functionality

- Simple mechanism provides functionality of two features
- Provides multiple applications with one truck reducing overall cost
