

SAFESYNC™

Smarter Class 8 dump truck safety starts here.

SafeSync brings together control, safety, and visibility in one streamlined system for dump truck operations. It helps operators make better decisions with real-time feedback while built-in interlocks are designed to prevent unsafe actions that can lead to downtime or damage. Customizable settings ensure the system adapts to each job site, while integrated diagnostics simplify maintenance and support. It's a smarter, more reliable way to manage your operation from start to finish.

drivesafesync.com | (800) 763-6017 | sales@j-craftinc.com

- Easy-to-Use Touchscreen AND tactile buttons
 - Body-up warning when driving over set speed/RPM
 - Body height limit (adjustable) helps prevent overhead strikes
 - Alert when dumping on unsafe slope or grade
 - Alert when driving with open or unlocked tailgate at speed
 - PTO kickout at unsafe speed or RPM
 - Interlocks designed to prevent damaging tarp and vibrator
 - Built-in diagnostics & remote diagnostics available
- ...And many more features designed to protect the operator, equipment, and the job site

Every job site demands precision, efficiency, and above all, safety. SafeSync delivers all three. With tactile and touchscreen controls, operators can manage PTO, dump body, tailgate, tarp, vibrator, body heat control, lights, retractable mud flaps and cameras with ease.
